***Allowable Subject Matter***

Claims 21-86 are allowed.

The following is an examiner's statement of reasons for allowance: the applied prior art does not disclose or render obvious a process, as called for in claim 20, in which a first effluent containing less than about 1,000 ppm oxygen. As disclosed by Griffiths, it would not be obvious to modify the Griffiths process to arrive at the claimed process since Griffiths wants to retain oxygen with two purposes (1) oxygen for subsequent reaction, (2) heat for cracking the hydrocarbon with the second catalyst (col. 1, lines 62-63; col. 1, lines 44-48 and col. 2, lines 59-62). The applied prior art also does not disclose or render obvious a process as called for in claims 44, 49, and 76, wherein the heating zone is in thermal contact with the first reaction zone through a dividing element that allows at least a fraction of the heat produced in the first reaction zone to be transferred to the heating zone, and wherein the dividing element does not allow permeation of gaseous components to and from the heating zone and said first reaction zone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
